Active participant on [Frontend Mentor](#) with a track record of successfully completing challenging projects.

SKILLS

- HTML5
- CSS3
- JavaScript
- React.js
- Responsive Web Design
- Bootstrap5
- Material UI

PROJECTS

ArrayBuilder

- *It's a helpful tool for learning and practicing array manipulation in JavaScript.*
- *ArrayBuilder gives two choices to the user - wheather to generate random array or take array from the user.*
- *After that, a user can select an array manipulation activity from the list.*
- *Based on the user selection, ArrayBuilder displays the modified array to the user.*
- *Technologies used - React library, Material UI, Custom-styling using makeStyles*

Task-Tracker

- *Simple React task-tracker or todo app.*
- *With basic functionality of adding, deleting tasks.*
- *Technologies used - React library, CSS 3, PropTypes library.*

Personal Portfolio

- *My responsive portfolio website showcase of my work as an aspiring frontend developer.*
- *It provides a glimpse into my projects, skills, and educational background.*
- *Technologies used - React library, React-router, Bootstrap5, CSS3 for custom styling, React-Bootstrap Icons.*
